TREE PLANTATION PROGRAMME

Together We Plant • Together We Protect • Together We Thrive

Plant a Tree Today, Secure a Greener Tomorrow

UNDER THE GUIDANCE OF

Dr. Baig Mumtaz
Head,
Department of Botany

Dr. Shahim Fatema
Faculty,
Department of Botany

WITH THE ACTIVE PARTICIPATION OF
B.Sc. BOTANY STUDENTS

BENEFITS OF TREE PLANTATION

- Improves Air Quality
- Reduces Temperature
- Conserves Water
- Conserves Soil
- Supports Biodiversity

GO GREEN
BREATHE CLEAN
LIVE GREEN

GREEN CAMPUS **ENVIRONMENTAL AWARENESS** **SUSTAINABLE FUTURE**

"Let's nurture nature so that we can have a better future."

DEPARTMENT OF BOTANY

Inauguration of Departmental Wall Magazine – "BOTANICA"

Date	14 August 2026	Activity	Wall Magazine Inauguration
Department	Botany	Coordinator	Dr. Baig Shawkat, Head, Department of Botany
Participants	Botany students and faculty members	Venue	Department of Botany

Aim

To provide Botany students with a creative academic platform to communicate botanical knowledge, scientific ideas and environmental awareness through a departmental wall magazine.

Objectives

- Encourage creativity, scientific thinking and interest in Botany.
- Develop skills in scientific writing, illustration, poster preparation and presentation.
- Promote awareness of plant diversity, biodiversity and environmental conservation.
- Strengthen teamwork, leadership, communication and student participation.
- Create an engaging and informative academic environment in the department.

Activity / Proceedings

The Department of Botany inaugurated its wall magazine "BOTANICA" on 14 August 2026. Students actively contributed botanical posters, illustrations and educational material. Faculty members guided the students in selection, preparation and display of the content. The activity encouraged students to present scientific information in an attractive and accessible form.

Outcomes

- Enhanced student interest and participation in departmental academic activities.
- Improved scientific communication, presentation and creative skills.
- Developed teamwork and collaborative learning among students.
- Encouraged students to connect classroom learning with visual and experiential learning.
- Strengthened awareness of botanical and environmental themes.

Action Taken Report (ATR)

Action Point	Action Taken / Evidence
Student involvement	Students prepared and contributed material for BOTANICA.
Faculty guidance	Faculty guided students in content selection, scientific presentation and display.
Display & inauguration	Wall magazine was displayed in the Botany Department and inaugurated on 14 August 2026.
Documentation	Photographs and activity record maintained for departmental/NAAC-IQAC documentation.

Educational Visit of Boon English School to the Department of Botany

The Department of Botany, Dr. Rafiq Zakaria College for Women, Chhatrapati Sambhajinagar, organized an educational visit for the students of Boon English School on 3rd September 2026. The main objective of the visit was to create awareness among school students about plant diversity, botanical science, and the importance of plants in our daily lives.

Activities Conducted

During the visit, students were welcomed by the Dr.Baig Mumtaz Head of the Department of Botany. The students were introduced to various facilities and activities of the department. The following activities were conducted:

1. Botany Laboratory Visit: Students were introduced to the Botany laboratory and various laboratory instruments.
2. Microscope Demonstration: Students were explained the uses of microscopes and their importance in studying plant cells and microorganisms.
3. Botanical Museum Visit: Students observed preserved plant specimens and botanical collections.
4. Plant Identification: Students were introduced to different plant species and their identifying characteristics.
5. Medicinal Plants Awareness: Information was provided about medicinal plants and their traditional uses.
6. Botanical Garden Visit: Students observed different ornamental and medicinal plants and learned about plant diversity and conservation.

Learning Outcomes

- Developed interest in the subject of Botany.
- Gained basic knowledge about laboratory instruments and microscopes.

Dr. Baig Mumtaz
Head
Department of Botany
Dr. Rafiq Zakaria College for Women,
Chh.Sambhajinagar-431001 (M.S.)

- Understood the importance of medicinal and ornamental plants.
- Acquired awareness about plant diversity and biodiversity conservation.
- Encouraged scientific curiosity and environmental awareness among school students

Conclusion

The educational visit was informative and beneficial for the students of Boon English School. It provided them with an opportunity to gain practical exposure to botanical science beyond classroom learning. The visit encouraged students to develop an interest in plants, nature, and environmental conservation.

The Department of Botany expresses its gratitude to the school authorities and accompanying teachers for their participation.

2. Action Taken Report (ATR)

Sr. No.	Activity / Objective	Action Taken / Outcome
1	To promote scientific awareness	School students were introduced to the subject of Botany.
2	To provide practical exposure	Laboratory facilities and instruments were demonstrated.
3	To develop scientific curiosity	Microscope demonstration was conducted.
4	To create awareness about biodiversity	Students were introduced to different plant species.
5	To promote medicinal plant awareness	Information about medicinal plants was shared.
6	To strengthen institutional outreach	An educational interaction was conducted between the college and school students.
7	To encourage environmental responsibility	Students were motivated to conserve plants and protect nature.

3. Outcome and Impact

- Strengthened school–college interaction.
- Promoted experiential and activity-based learning.
- Created awareness about the importance of botanical education.
- Encouraged young students to pursue science education.
- Supported the institution's community outreach and extension activities.

DEPARTMENT OF BOTANY

Title of Activity

Preparation of Plant Sampling .

Date: 07th October 2026

Venue: Department of Botany

Organized by: Department of Botany

Activity Coordinators:

- **Dr. Baig Mumtaz** – Head, Department of Botany

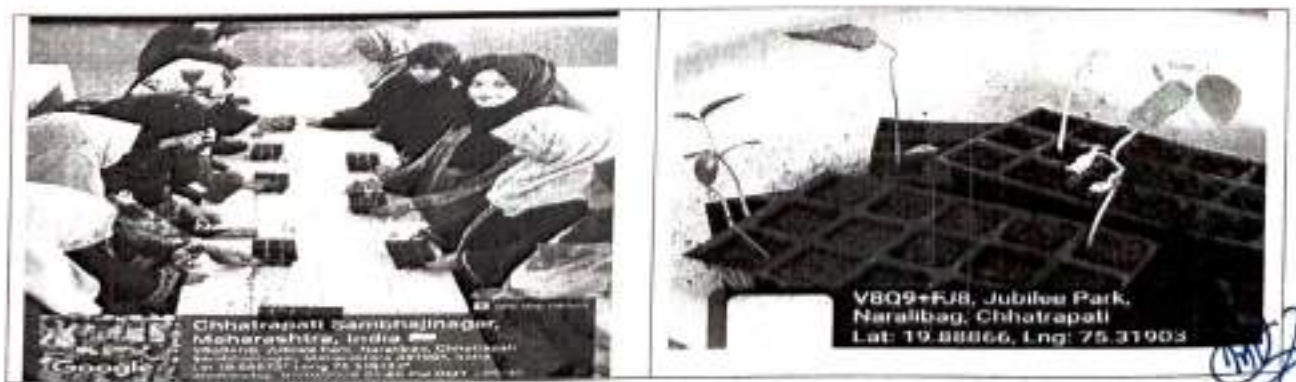

1. Introduction: The Department of Botany organized a practical activity on "**Preparation of Plant Sampling** on 07 October 2026. The activity was designed to provide students with hands-on experience in the collection, selection, preparation and handling of representative plant samples for botanical study. Students actively participated in preparing seedlings and plant samples using nursery/seedling trays under the guidance of the faculty members. The activity helped students connect theoretical concepts with practical botanical work.

2. Aim : To develop practical skills among students in plant sampling, seedling preparation, sample handling, observation and botanical documentation.

3. Objectives :

1.To familiarize students with basic techniques of plant sampling.
2.To develop skills in selecting healthy and representative plant material.
3.To provide practical experience in seedling/sample preparation.
4.To develop proper handling and labelling skills.
5.To encourage careful observation of plant growth and morphology.
6.To promote teamwork and scientific documentation among students.

4. Activity Conducted : Students were provided with seedling trays containing growing plant material. Under the supervision of **Dr. Baig Mumtaz, Head, Department of Botany**, and **Dr. Shahim Fatima, Assistant Professor**, Students: Prepared and handled plant seedlings carefully. Selected healthy and representative seedlings for sampling. Observed different stages of seedling growth. Practised transferring and arranging seedlings in sampling trays. Examined plant characters useful for botanical study. Prepared plant material for further observation and documentation. Worked collaboratively in groups while maintaining proper handling of samples. The photographic evidence shows students actively engaged in the practical preparation and handling of plant samples.

Dr. Baig Mumtaz
Head
Department of Botany
Dr.Rafiq Zakaria College for Women,
Aurangabad (M.S) India

5. Action Taken : The Department successfully conducted the practical plant-sampling activity. Students were guided regarding proper selection, handling and preparation of plant material. Seedlings were maintained in trays for further growth and observation, and photographic documentation was carried out as evidence of the activity.

6. Outcomes

The activity resulted in:

1.Improved practical skills in plant sampling and handling.
2.Better understanding of seedling growth and plant development.
3.Enhanced observation and identification skills.
4.Improved teamwork and coordination among students.
5.Development of scientific documentation skills.
6Increased student interest in practical botanical studies.

7. Evidence / ATR

Photographic evidence:

1. Students participating in hands-on preparation of plant samples using seedling trays.
2. Prepared and growing plant seedlings maintained for sampling and further botanical observation.

Activity location recorded in photographs: Botany Department, Jubilee Park, Naralibag, Chhatrapati Sambhajinagar.

8. Conclusion

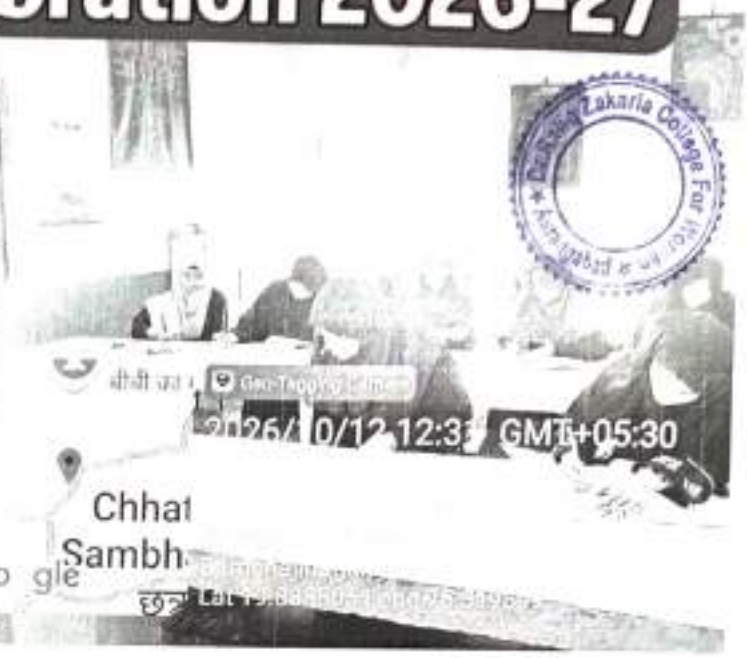

The **Preparation of Plant Samples for Sampling** activity was successfully completed by the Department of Botany. The hands-on approach provided students with valuable practical experience in plant handling, sampling, observation and documentation. The activity contributed effectively to experiential learning and strengthened students' practical skills in Botany.

ACTIVITY REPORT WITH ACTION TAKEN REPORT (ATR)
WORLD ALGAE DAY CELEBRATION — 12th OCTOBER 2026

Name of Activity	World Algae Day Celebration
Date and Venue	12 October 2026; Botany Laboratory
Organising Department	Department of Botany
Activity Coordinator	Dr. Baig Mumtaz, Associate Professor and Head, Department of Botany

1. Objectives

- To create awareness about algal diversity, habitats and ecological importance.
- To explain the role of algae in oxygen production, aquatic food chains and carbon fixation.
- To introduce students to useful applications of algae in food, biofertilizers and sustainable development.
- To encourage scientific creativity, teamwork and communication through poster preparation and presentation.

Report :

The Department of Botany celebrated World Algae Day on 12 October 2026 in the Botany Laboratory of Dr. Rafiq Zakaria College for Women, Chhatrapati Sambhajinagar. Students participated by preparing and displaying informative posters on algae, including their diversity, structure, habitats, ecological importance and practical applications. The displays highlighted the contribution of algae to oxygen production, aquatic food chains, carbon fixation, food products and biofertilizers. The activity supported experiential learning and helped students strengthen subject knowledge, scientific creativity, poster presentation skills and environmental awareness. The programme was conducted under the guidance of Dr. Baig Mumtaz, Associate Professor and Head, Department of Botany.Dr.Shahim Fatima Asst .Professor took the effort to arrange the event.

Outcomes

- Students improved their understanding of algal diversity and their ecological and economic significance.
- Poster preparation encouraged independent learning, teamwork and scientific communication.
- Students developed greater awareness of algae as important organisms for ecosystem functioning and sustainability.

Action Taken Report (ATR)

Planned Action / Objective	Action Taken	Status / Evidence
Create awareness about algae	Conducted an educational activity on algal diversity and significance.	Completed; activity photograph
Promote student participation	Students prepared and displayed algae-related posters in the Botany Laboratory.	Completed; poster display visible in photo
Support experiential learning	Used poster preparation and display to reinforce classroom learning.	Completed; activity documentation
Encourage environmental awareness	Discussed ecological roles and useful applications of algae.	Completed; report and photo evidence

Exploring the Botanical Museum of the College

Date	15th October 2026
Class	B.Sc. Third Year Botany
Number of Participants	15 students
Organized by	Department of Botany
Head of the Department	Dr. Baig Mumtaz, Associate Professor and Head

1. Aim: To familiarize B.Sc. Third Year Botany students with botanical specimens, preserved plant materials, and educational resources available in the Botanical Museum of Botany Department.

2. Objectives:

- To enhance students' knowledge of plant diversity and classification.
- To observe and study preserved botanical specimens and plant materials.
- To understand the importance of botanical museums in teaching, research, and biodiversity conservation.
- To develop observation, identification, and documentation skills.

3. Description of the Activity: The Department of Botany organized an educational activity titled "Exploring the Botanical Museum of the Botany Department of College" on 15th October 2026 for 15 students of B.Sc. Third Year Botany. Students explored the Botanical Museum and observed the specimens and educational materials available for botanical study. They were encouraged to examine the morphological features of plant specimens, understand their scientific significance, and appreciate the role of museum collections in the study of plant diversity, taxonomy, and conservation. The activity provided an opportunity for experiential learning and helped connect theoretical concepts with practical observations.Dr.Shahim Fatima took the efforts for arranging event.

4. Learning Outcomes

- Students gained practical exposure to botanical museum resources.
- They improved their observation and understanding of plant diversity.
- They recognized the educational and research value of preserved specimens.
- They developed greater interest in botanical documentation and biodiversity conservation.

Action Taken Report (ATR)

Sr. No.	Action Taken	Outcome
1	Organized a visit to the college Botanical Museum on 15th October 2026.	Students received practical exposure to museum resources.
2	Guided 15 B.Sc. Third Year students in observing botanical specimens.	Improved observation and identification skills.
3	Explained the educational importance of botanical collections.	Increased awareness of plant diversity and conservation.
4	Encouraged students to relate museum observations to classroom learning.	Strengthened experiential and outcome-based learning.
5	Documented the activity for departmental records.	Evidence can be attached for IQAC/NAAC documentation.

Conclusion: The activity was a useful learning experience for the participating students. Exploring the college Botanical Museum strengthened their understanding of plant diversity and highlighted the importance of museum collections in botanical education and research.

REPORT ON MCQ SOLVING ACTIVITY

The Department of Botany organized an MCQ Solving Activity for the students of B.Sc. First Year on 06th October and 16th October 2026 with the objective of strengthening their subject knowledge, improving conceptual understanding and preparing them for competitive examinations. The activity was conducted to encourage active learning, develop analytical thinking and enhance the problem-solving abilities of students. A set of multiple-choice questions based on the prescribed Botany syllabus was provided to the students. The questions covered important topics from the syllabus, including basic concepts of Botany, plant morphology, plant diversity, cell biology and other relevant topics. Students actively participated in solving the MCQs within the allotted time. After completion of the activity, the answers were discussed and explained by the faculty. Doubts raised by students were clarified, helping them understand the concepts more effectively .The activity received a positive response from students and contributed to improving their confidence, knowledge and examination preparation.

Outcomes of the Activity

1. Improved conceptual understanding of Botany.
2. Enhanced objective-type question-solving skills.
3. Improved time management and accuracy.
4. Identification of learning gaps and areas requiring improvement.
5. Increased confidence in competitive and university examinations.

Conclusion

The MCQ Solving Activity was successfully conducted and proved beneficial for B.Sc. First Year students. Such activities will be organized regularly to promote participative learning and academic excellence.

REPORT ON PEER TEACHING ACTIVITY

The Department of Botany organized a Peer Teaching Activity for B.Sc. First Year students on 19th October and 23rd October 2026 on the topic "Morphology of Angiosperms."

The main objective of this activity was to encourage active learning, develop communication skills, improve subject understanding and promote collaborative learning among students. During the activity, students participated enthusiastically and explained various morphological features of angiosperms. The topics covered included the structure and functions of roots, stems, leaves, flowers, fruits and seeds. Students also discussed different types of root systems, stem modifications, leaf arrangements, venation, inflorescence and floral parts with suitable examples. Students used classroom teaching aids, diagrams and illustrations to explain the concepts. The peer teaching approach provided an opportunity for students to develop confidence, presentation skills, teaching abilities and scientific understanding.

The activity was conducted successfully under the guidance of Dr. Baig Mumtaz, Associate Professor and Head, Department of Botany.

2. Objectives

1. To develop teaching and presentation skills among students.
2. To enhance understanding of the morphology of angiosperms.
3. To encourage collaborative and participatory learning.
4. To improve students' confidence and communication skills.
5. To develop observation and scientific explanation skills.

3. Learning Outcomes

- Students understood the basic morphological characters of Angiosperms.
- Students identified different plant parts and their modifications.
- Students improved their communication and presentation skills.
- Students developed confidence through active participation.
- Students learned through peer interaction and collaborative discussion.
