REPORT ON ONE-DAY SEMINAR

"DISCOVER THE POWER OF NUTRITION"

Occasion	Celebration of Nutrition Month
Date	26 September 2026
Time	10:30 a.m.
Organized by	Department of Home Science
Programme	One-Day Seminar - Discover the Power of Nutrition
Keynote Speaker	Ms. Bhavna Varma
President	Prof. Vidya Pradhan, I/C Principal

Introduction

As part of the celebration of **Nutrition Month 2026**, the Department of Home Science, Dr. Rafiq Zakaria College for Women, Chhatrapati Sambhajinagar, organized a one-day seminar titled **“Discover the Power of Nutrition”** on **26 September 2026 at 10:30 a.m.** The programme focused on creating meaningful awareness about the role of nutrition in everyday life and helping students understand how informed food choices contribute to health and well-being.

Aim of the Seminar

The seminar aimed to strengthen students’ understanding of the power of nutrition and to connect academic knowledge with practical, day-to-day food and lifestyle choices. It sought to encourage participants to view nutrition not merely as a subject of study, but as an essential foundation for healthier living and long-term well-being.

Objectives

- To create awareness about the importance of food and nutrition in sustaining a healthy life.
- To help students understand the relationship between dietary choices, lifestyle and health.
- To reinforce the concept of balanced nutrition and appropriate food selection.
- To encourage healthier eating habits and informed decision-making in everyday life.
- To provide students with an opportunity to learn from an expert speaker and participate in an academic discussion on nutrition.

Programme Proceedings

The seminar was conducted in the college seminar hall in the presence of the college administration, faculty members and students. The programme commenced with the formal welcome of the dignitaries and guests. The event banner highlighted the Nutrition Month celebration and the central theme, **“Discover the Power of Nutrition.”**

The keynote session was delivered by **Ms. Bhavna Varma**. Through an informative presentation, the session emphasized the influence of nutrition on the quality of everyday life and the importance of making conscious food choices. Visual presentation material was used during the seminar to support the discussion and to make key nutrition concepts more engaging and understandable for the audience.

The session addressed the broader idea that what we eat plays an important role in shaping health. The presentation encouraged students to reflect on balanced meals, nutritional quality, healthy food selection and lifestyle practices. The academic setting, supported by projected visual material, helped maintain student interest and made the seminar interactive and relevant to practical life.

The programme was presided over by **Prof. Vidya Pradhan, I/C Principal**. Faculty members and invited dignitaries were seated on the dais and actively supported the programme. The seminar also included formal acknowledgement and felicitation, reflecting the department's appreciation for the contribution of the resource person and guests.

Student Participation

Students attended the seminar in large numbers and followed the presentation attentively. The seminar provided an academic platform for students to connect classroom concepts of food and nutrition with everyday health decisions and encouraged thoughtful discussion on healthier dietary and lifestyle practices.

Conclusion

The one-day seminar **"Discover the Power of Nutrition"** was a meaningful component of the Department of Home Science's Nutrition Month celebration. It successfully combined expert guidance, visual learning and student participation to promote nutrition awareness. The programme reinforced the message that good nutrition is an everyday responsibility and that informed dietary and lifestyle choices can contribute significantly to a healthier future.

Outcomes

- Improved awareness among students regarding the importance of nutrition in daily life.
- Better understanding of the connection between food choices, lifestyle and health.
- Greater appreciation of balanced and mindful eating practices.
- Enhanced student exposure to expert-led academic discussion and visual learning.
- Successful promotion of the Nutrition Month message through an informative college-level seminar.

Senior College Cooking Competition - Nutrition Month 2026

Date	12 September 2026
Time	12:00 p.m.
Event	Senior College Cooking Competition
Organized by	Department of Home Science
Theme	Nutrition Month 2026 - Nourish Today, Lead a Healthier Tomorrow

Judges

- **Mrs. Suraiyya** - Principal, Toddler Nursery
- **Mrs. Seema** - Principal, Mayflower Academy
- **Mrs. Taskeen** - Principal, D.Ed. College
- **Mrs. Maya Wanjare** - Retired Professor, Government College of Arts & Science

Aim

The Senior College Cooking Competition was organized as part of Nutrition Month to promote practical understanding of nutritious food preparation and to encourage students to apply their knowledge of food, health and balanced nutrition in creative ways. The activity combined healthy cooking, culinary skills, hygiene, presentation and nutrition awareness in an engaging learning environment.

Objectives

- To promote awareness of nutritious ingredients and healthier food choices among senior college students.
- To provide practical exposure to cooking with fire and cooking without fire.
- To develop culinary skills, creativity, confidence and attractive food presentation.
- To encourage hygienic food handling and thoughtful selection of ingredients.
- To connect theoretical knowledge of food and nutrition with practical meal and snack preparation.

Competition Categories

Cooking with Fire (Millet Based): preparations using millets such as Ragi, Bajra, Jowar, Oatmeal and Barley.
Cooking without Fire: beverages, smoothies, juices, milkshakes and sprouts-based preparations.

Detailed Report

The Department of Home Science, Dr. Rafiq Zakaria College for Women, organized the **Senior College Cooking Competition** on **12 September 2026 at 12:00 p.m.** as part of the Nutrition Month celebrations. The programme was designed to make nutrition education practical, creative and participatory while encouraging students to explore healthier methods of food preparation.

The competition included two broad categories - Cooking with Fire and Cooking without Fire. In the Cooking with Fire category, emphasis was placed on millet-based preparations using nutritious grains such as ragi, bajra, jowar, oatmeal and barley. The Cooking without Fire category encouraged participants to prepare refreshing and nutritious beverages, smoothies, juices, milkshakes and sprouts-based items. These categories helped students understand how everyday ingredients can be transformed into appealing and nourishing food choices.

The competition was judged by **Mrs. Suraiyya, Principal of Toddler Nursery; Mrs. Seema, Principal of Mayflower Academy; Mrs. Taskeen, Principal of D.Ed. College; and Mrs. Maya Wanjare, Retired Professor, Government College of Arts & Science.** Their presence added academic value and encouragement to the programme. The judges interacted with the participants, observed the displays and evaluated the preparations on relevant aspects such as nutritional value, taste, texture, hygiene, creativity and presentation.

Participants displayed their dishes in an attractive and organized manner and explained their preparations during the evaluation. The activity enabled students to demonstrate not only cooking skills but also their understanding of the relationship between food choices and health.

The event also included appreciation and felicitation moments, adding encouragement and recognition to the students' efforts as well as acknowledging the contribution of the invited judges. The enthusiastic participation and variety of dishes created a lively academic environment within the Home Science Department.

Overall, the Senior College Cooking Competition successfully combined nutrition education with hands-on learning. It encouraged students to think creatively about healthier foods, understand the value of millets and nutritious ingredients, and develop practical skills that can be applied in everyday life. The programme contributed meaningfully to the Nutrition Month theme of nourishing today for a healthier tomorrow.

Outcomes

- Students gained practical knowledge of healthy cooking methods and nutritious ingredients.
- Participants developed greater awareness of millets and their use in everyday food preparation.
- The activity enhanced creativity, confidence, culinary skills and food presentation.
- Students strengthened their understanding of hygiene, taste, texture and nutritional value.
- The competition made nutrition education interactive, enjoyable and application-oriented.

Junior College Cooking Competition – Nutrition Month 2026

Date	15 September 2026
Time	12:00 p.m.
Event	Junior College Cooking Competition
Organized by	Department of Home Science
Theme	Nutrition Month 2026

Aim

The Junior College Cooking Competition was organized as part of Nutrition Month to encourage students to understand nutritious food preparation through practical participation. The activity aimed to combine nutrition knowledge, culinary skills, creativity, hygiene and attractive food presentation in an enjoyable learning experience.

Objectives

- To create awareness about nutritious food choices and healthier methods of food preparation.
- To develop practical cooking, plating and presentation skills among junior college students.
- To encourage students to explore both cooking-with-fire and cooking-without-fire preparations.
- To promote creativity, teamwork, confidence, hygiene and responsible handling of food.
- To help students connect classroom knowledge of food and nutrition with everyday meal preparation.

Competition Categories

Cooking with Fire: Indian snacks, including Dahi Bade and Wada Sambhar.
Cooking without Fire: Veg. Salad, Fruit Chat, Beverages, Smoothies, Sprouts-based preparations and Fudge.

Judging Criteria

The preparations were evaluated on important aspects such as **plating, taste, texture and overall presentation**. The competition format included Cooking with Fire (C1) and Cooking without Fire (C2), encouraging students to demonstrate a balanced combination of culinary knowledge and presentation skills.

Detailed Report

The Department of Home Science, Dr. Rafiq Zakaria College for Women, organized the **Junior College Cooking Competition** on **15 September 2026 at 12:00 p.m.** as part of the Nutrition Month celebrations. The programme provided students with a practical platform to demonstrate their understanding of food, nutrition, preparation techniques and healthy eating.

Students participated enthusiastically and displayed a variety of preparations under the Cooking with Fire and Cooking without Fire categories. The tables were arranged with prepared dishes, beverages and

nutritious accompaniments, allowing participants to explain their recipes, ingredients and presentation ideas. The activity transformed nutrition education into an interactive experience in which students could learn through planning, preparation and presentation.

The competition encouraged participants to pay attention not only to taste but also to texture, plating, cleanliness and overall appearance. The Cooking without Fire category particularly highlighted how simple ingredients can be used creatively to prepare salads, fruit-based dishes, beverages, smoothies and sprouts-based items without conventional cooking. The Cooking with Fire category allowed students to demonstrate practical preparation skills through Indian snack items.

Faculty members observed the displays and interacted with the participants during the event. Students confidently presented their preparations and demonstrated creativity in decoration and plating. The programme created an engaging academic environment and helped students appreciate that nutritious food can also be attractive, enjoyable and thoughtfully prepared.

Overall, the Junior College Cooking Competition was a meaningful Nutrition Month activity that successfully combined practical learning with creativity. It helped reinforce the importance of healthy food choices while developing students' culinary, communication and presentation skills.

Outcomes

- Students gained practical experience in preparing and presenting nutritious food.
- Participants developed greater awareness of healthy ingredients and food choices.
- The activity strengthened creativity, confidence, teamwork and presentation skills.
- Students understood the importance of taste, texture, hygiene and attractive plating.
- The competition made nutrition education more participatory and application-oriented.

REPORT WRITING

Poster Presentation on Nutrition

Date	21 September 2026
Event	Poster Presentation - Nutrition
Resource Person / In-charge	Dr. Zartaj Kasmi
Number of Participants	20 Students

Aim

The Poster Presentation was organized to create awareness among students about the importance of nutrition in day-to-day life and to provide a creative platform through which they could communicate useful information related to food, health, balanced nutrition and healthy lifestyle practices.

Objectives

- To enhance students' knowledge about nutrition, nutrients and balanced food habits.
- To help students understand the importance of lifestyle modification for maintaining good health.
- To educate students about healthy foods and the role of nutrition in growth, development and disease prevention.
- To encourage students to research nutrition-related topics and present scientific information in a simple and attractive manner.
- To develop creativity, confidence, communication and presentation skills through poster-making and explanation.

Detailed Report

The Department of Home Science, Dr. Rafiq Zakaria College for Women, organized a Poster Presentation on Nutrition on 21 September 2026. The activity was conducted as an educational and awareness-based programme to highlight the relationship between food, nutrition, health and lifestyle. A total of 20 students participated enthusiastically and prepared handmade posters on different nutrition-related themes.

The posters covered a wide range of topics such as carbohydrates, dietary fibre, water and its importance, calcium, iron and anaemia, iodine, food groups, protein-energy malnutrition, vitamins, the food pyramid, functions of food and the role of nutrients in maintaining good health. The variety of topics made the activity informative and enabled students to explore both basic and practical aspects of nutrition.

During the presentation, students explained the concepts represented in their posters and shared relevant information with the audience. The activity encouraged them to go beyond textbook learning by collecting, organizing and visually presenting information. It also provided an opportunity to improve confidence, communication skills and the ability to explain health-related concepts clearly.

The participants showed creativity in the use of illustrations, charts, headings and key messages. The presentations emphasized the importance of making healthy food choices, understanding nutrients,

following a balanced diet and adopting positive lifestyle changes. The programme therefore served both as a learning activity for the participants and as an awareness activity for the students who viewed the posters.

The response to the programme was encouraging. Students participated actively and demonstrated interest in learning about nutrition and healthy living. Overall, the Poster Presentation was an informative, creative and meaningful academic activity that successfully combined nutrition education with student participation and presentation skills.

Outcome

- Students gained better awareness of nutrition, nutrients and healthy food choices.
- Participants improved their research, creativity and presentation skills.
- The activity encouraged discussion about balanced diets and healthier lifestyle practices.
- Students were able to communicate nutrition information through an engaging visual medium.

Attendance

Attendance: 50/100 Students
